JOB OBJECTIVE

Pursue a career in software development, emphasizing expertise in user interface design while progressively enhancing skills in server-side programming and database management. Targeting opportunities within the IT industry.

CORE COMPETENCIES

Software Development Life Cycle

User Experience Design

Responsive Web Design

Agile Project Management

Cross-Platform Development

Database Design and Management

Cloud Computing Concepts

System Architecture

Continuous Integration & Deployment

TECHNICAL SKILLS

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, React, Redux

Backend: Node.js, Express.js

Database: PostgreSQL, MongoDB

Version Control: Git, GitHub

EDUCATION

Master of Computer Applications (MCA) from Center for Development of Advanced Computing, GGSIPU, New Delhi in 2023

Bachelor of Computer Applications (BCA) from Bidhan Chandra College, Kazi Nazrul University, West Bengal in 2019

12th from DAV Public School in 2016.

10th from DAV Public School in 2013.

PERSONAL DETAILS

Languages: English & Hindi

Address: Dwarka

PROFILE SUMMARY

- Amassed extensive knowledge in software engineering, concentrating on crafting engaging and accessible applications that meet user needs and industry standards.
- Participate in an internship at CDAC Hackathons, focusing on the creation of cutting-edge software applications while refining technical skills through teamwork and shared learning experiences.
- Evolve from a front-end development role to a full-stack position, gaining proficiency in modern technologies such as ReactJS, JavaScript, NodeJS, and MongoDB, while also deepening knowledge of critical back-end systems.
- Create and deploy a comprehensive Hackathons Management System that optimizes the management of coding challenges, mainly improving the experience for both administrators and participants.
- Exhibit exceptional analytical skills and proficient communication, promoting teamwork and ensuring that project goals are achieved with high efficiency.
- Thorough comprehension of Agile practices, playing vital role in delivering software solutions that meet user expectations support organizational objectives.
- Finalize projects, such as a movie search platform & a bill-splitting application, showcasing capability to produce both functional & aesthetically pleasing solutions.
- Exhibit expertise in version control tools, especially Git and GitHub, enabling efficient collaboration and effective code management within team settings.

WORK EXPERIENCE

CDAC Hackathons, New Delhi | February 2023 to June 2023 | Intern

- Spearheaded the development of a comprehensive Hackathons Management System utilizing Spring Boot, ensuring a robust framework for managing coding challenges effectively.
- Collaborated with team members to design user-friendly interfaces, enhancing the overall user experience through navigation and responsive design principles.
- Engaged in the integration of PostgreSQL for efficient data management, ensuring seamless storage and retrieval of coding questions and participant information.
- Conducted thorough testing and debugging of applications, identifying and resolving issues to maintain high-quality standards in software delivery.
- Assisted in the documentation of project specifications and user manuals, providing clear guidelines for future reference and user support.

PROJECTS

E-commerce Web Application | React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Multer | 2025

- Developed a full MERN stack e-commerce platform with features like product listing, shopping cart, and order placement. Implemented secure user authentication and role-based authorization using JWT tokens, and enabled product image uploads with Multer, storing URLs in MongoDB. Created an admin dashboard for managing products, users, and orders, and utilized Redux Toolkit for state management. Ensured a responsive UI using Tailwind CSS and integrated RESTful APIs for seamless frontend-backend data communication.

usePopcorn | React, OMDb API | 2023

- Developed an intuitive movie search and watchlist management application leveraging React Hooks and the OMDb API for seamless user interaction and real-time data retrieval.

Eat-n-Split | React | 2023

- Engineered a comprehensive bill-splitting application, enabling users to add friends, allocate shared expenses, and track outstanding balances with dynamic feedback on amounts owed.
